**CITY OF SANNICANDRO: LANDSCAPE RECONFIGURATION OF VALLONE CREEK'S WATER COURSE**

Claudio Grimellini, Giuseppina Crisci - Università Federico II – Istituto Nazionale bioarchitettura

**Track d. Water and land in the landscape project**

**Keywords:** Technologies, sustainability, resources, rehabilitation, landscape

**Abstract:**

Sustainable technologies for implementation of safety measures by seasonal overflows of Vallone creek, in urban area of Sannicandro's Municipality. Suitable strategies for rehabilitation by negative processes that strengthen and support landscape and environmental values (water, soil, etc.) of the whole urban area, through natural and artificial resources starting from creek's watercourse.
